

Capital Vault Incorporated : Business Development Group : [Order_BDG_A+P]
Student Account [BDG_A_S] : [Order_BDG_A_S]

Opportunity & Vision:

The Student Account is for those who already are students in college, trade, technical or university and has potential for those in any kind of study, but also those that relate to and have a lot in common with the CVI-Options, accounts, portfolios, programs, projects, technology, products and services. There are also some options dedicated to solve or help with the most challenging and demanding requirements during and in between studies configured for students.

1. This works a lot like the Co-operative Group Account, but student focused;
2. Integrated with other CVI-Options, the Trade & Technology Programs, enable revenue opportunities including intellectual capital investment, network development, real world challenges, entrepreneurial, independent and integrated work group options, joint ventures and ground floor opportunities;
3. Useful for immediate, intermediate and long term planning, career and life options;
4. Develop relevant options with a mix of price, quality, style and function to enable various characteristics in value, durability and performance features to choose from.
5. Generate relevant savings, revenue and work options to capitalize on, enable flexible possibilities in diverse environments and situations. Contribute to the quality of life, increased opportunities and options, with a forward looking view that is pro-active, disciplined, ambitious, challenging and rewarding.

More student focused options under development;

Agenda: Scholarships, co-operative work programs, experimental and applied resources and facilities for special projects and CVI-Options. Mastermind Group optimization and more!
