

Capital Vault Incorporated : Construction Group : [Order_CG]
CG MAX RSVP Account : [Order_CG_MAX_RSVP]

Opportunity & Vision: "Stockpile & Deploy" - Please read the BDG_A_MR background file;

- The CG MAX RSVP offers the Revenue Generator (RG), Reserved, Conditional sign-op and Open Options (RCOO), Reserved, Dedicated sign-up and Secured Options (RDSO) and the Serial Options for general or more specific purposes.

- Our priorities and focus with this account is in providing a significant rate of return, additional compensation bonus in both monetary as well as products and services.

- The construction industry is vital to our personal and national well being and is a very visible and positive force in generating enthusiasm and progress on many levels. This account and various options generate a fundamental rate of 7.00% on average, which is ahead of a typical average real estate portfolio without the risk, overhead, unforeseen, fix and repair, damages or major expenses that may be incurred.

- The capacity to diversify into the Construction & Development, Construction Machinery, Custom Build Options or the Construction Options remains as a solid foundation to build upon, with some very specific incentives and bonus programs to kick in at various stages or points in the timeline. The bonus programs are related to the Construction Group portfolio and also to the TTG Construction Products Account and Portfolio, making for a really generous, practical and useful reward and compensation package above and beyond the regular rates and excellent features.

- The Acquisition Options Bonus operate a lot like what we call "the favour vault", since we are not a bank we do not really operate a favour bank in actuality, not to be too technical. At any rate, this offers great deals and continues to grow in relation to how much is put in a particular account. This feat of financial and asset conversion engineering is made possible by hard work, smart business and allocating resources in more productive enterprise, while minimizing risk, overhead and excess pure expense profiles that do not generate any rate of return and remain as a cost of doing business or operating a facility or enterprise. This is both exciting and beneficial as when you need something for your house, or would like to have this allocated as you desire, this can be arranged at no cost to you, unless of course you exceed the amount in addition to your planned expenses, then this can add value and reduce costs that would otherwise be incurred.

- For those members who are already familiar with the mechanics and idea behind a basic serial bond will be pleasantly delighted with the enhanced characteristics and features and all the amazing potential that can work to the advantage of the member. What is good about this is that additional bonus compensation is generated even after the term ends. This is added in appreciation of making the choice to be a part of something we consider very important to the Canadian economy. It is our pleasure to add this, not out of obligation, but more in continuing to build and maintain long term relationships. In the future, looking back at this time will be an excellent reminder and benefit, almost like a surprise.

- Please take the time to review these amazing options, if you have any questions, need a particular explanation for what you might or probably will do, please feel free to ask, as we are more than happy to explain how this can work to your advantage in so many ways.

To start construction in your portfolio, please advance to: [Order_CG_MAX_RSVP]
