

Capital Vault Incorporated - Private Venture Capital Group [Order_PVCG]
Venture Capital Options Account [PVCG_A_VCO]

Opportunity & Vision:

As venture capital people we like to have options, lots of them, rewarding ones, challenging us to respond, be involved, make a difference, show up with bags or truckloads of money, or simply write a cheque, transfer funds, read diligently the heart and soul of something in a prospectus, executive summary, or build on an idea whose time is just about to be realized.

Although we like the overnight success story, most people pay no consideration or value much to the person or group of people, that invest several thousand hours in their project, without pay, without much recognition, who work tirelessly with a passion and intensity beyond measure. Their life purpose with small and big dreams are tied up and invested to the max, there is no going back, there is no good enough, mediocrity and standard is not in the vocabulary or way of thinking or doing, there is no putting projects on the back burner, unless of course every possible solution has been exhausted with every shred of resources utilized, with every fibre of being expended in such totality, a veritable superman of focus, dedication and doing the right thing, the only thing. These people deserve our utmost respect and that we listen twice as much as we talk, our undivided attention, patiently with their stories, triumphs, difficulties, challenges, and yes, even frustration, disappointments and things that just don't work out. A lot like anyone, multiplied many times over.

Encouragement, appreciation, greater levels of contribution, involvement, financial power, resources and other elements are all something we choose to direct with this account and portfolio. Our energetic state is effectively deploying resources, a solid plan with an optimistic outlook and action that generates results and fuels the fire of dreams that burns with the energy and intensity.

Fortunately, in any endeavour, compensation with the basic elements and advanced meta-physical aspects of wealth, prosperity, co-creation, working together and the ultimate aspect of doing, being, experiencing and the rewards that comes with the territory, is part of the equation.

Opportunity, challenge and reward in what we are doing is important. Compensation, accountability and administration so everyone knows where they are at is an ongoing responsibility. Reasonable expectations are essential and exceeding those expectations is a bonus that can be engineered from the start and has plenty of room for innovation, generosity and many more beneficial options.

What we work on has already been created on the quantum level with pure thought. What we agree to work on is also the same, but amplified, just as how neurons in the brain are inter-related and work as a parallel processing super computer times about 100 billion or so, we work together to create results. The more we focus and work on a project, the more progress we make, we learn by doing, understand by being in on the action and applying focused energy and thought on what makes us feel alive.

Awareness and identifying with something special is essential to life. It may be the signal you have been waiting your whole life, and now, is the time to wake up from a dream. You have and are the ultimate decryption code. Now is the time for all good citizens to come to the aid of their country. It is time for something more up to speed, something that does much more than lighting up the neurons in your brain, something that is in your heart and soul, something with purpose, meaning and value.

Is this a new type of venture capital options topic? After all, we did not promise the conventional, boring, same old junk did we? We did already talk about perspective, awareness, understanding and the greatest adventure of all time, right? There are plenty of opportunities, and there really is a time and place for everything. It is true that everything happens for a reason, and it is possible to build something new, and that there is a first time for everything and maybe it could happen again, right?

It is an awesome experience for anyone to express the best of who they are and it is excellent for the perspective of being in tune with our greater purpose and nature. This includes not worrying about everything or anything and trusting that the universe has plenty, abundance and limitless power to look after those who do step out on faith, who simply express that confidence and belief and advance steadily with all the faculties of their being.

With this, it is possible that perhaps we can see eye to eye, be on the same page so to speak with common understanding and insight as we are dealing with people in the real world, not electronic graphs, trading algorithms and stuff like that, people, with heart and soul just like us. We are real men that enjoy using our mental faculties of creative imagination, we don't need computers running the stock market and experience micro manage ocd, performance syndrome or anything like that. We know everyone should believe in something and live according to those values, ideals and mission.

Being a venture capitalist is about service, creating value and fueling the fire. Every member of Capital Vault Incorporated is a venture capitalist, they invest in themselves and others, advancing forward in the direction of their dreams with energy, time, resources, trust and confidence.

As we focus our energies on creating wealth and opportunity, we generate action on what we like and envision, we experience the essence of the being, doing and achieving those endeavours. As a member/co-trustee, making decisions with money we control, with a vote of confidence that is self directed, personal, private and relevant, our skills at managing assets and resources and being more involved in a little nation building here and there, is a whole new perspective. The ability to influence, control and fulfill your destiny is a lot more possible with self trust and doing things personally.

A lot of energy has gone into the CVI initiative, every bit of it as important as the other, every member as important as the other. The good news is our worth is not measured by money and we are not the sum of our mistakes, we all have value, we do not need to be perfect to make a difference. We do not need to be accredited, sophisticated, arrogant, snobby or drive a fancy car. In fact there are a lot more options available that do not including investing and securities whatsoever.

Our focus is more into small business, creating jobs, new wealth generating power, manufacturing, engineering, R & D, fun stuff because we want to with a Made in Canada and Product of Canada emphasis. This takes being dedicated to go in a certain direction. Many times, the moment we get into something, everything else fits into place, in its own way and time naturally. There is no monopoly on ideas, inventions or sign up lists, we are good to go anytime.

With the Venture Capital Options, like all the other CVI-Options, accounts and portfolios, test our ability to rise to the challenge. Response, feedback, consensus, resolution and action working together to make something possible is all important. We have a vision to promote, a mission to achieve, problems to solve, resources and people to deploy and we have work to do.

This also involves directing assets and resources in more productive enterprise. We may even have national security emergencies in addition to general and strategic enterprise development. Since we know that being pro-active is different than thinking it will resolve itself, or that the problem will go away, or it's not as bad as they, we or anyone else says, or that some one else will fix it, or that it's a global problem. It's time to move on, we really can do better with Venture Capital Options!

With Capital Vault Incorporated, your life can be transformed with a whole different portfolio, charged up with a refreshing and revitalizing outlook, enthusiasm and energy in your every step. We hope that today and every day will be your best day ever, life with a new confidence and ability to take action, as we work to build great things together, successful in every way.
