

CVI-Strategic Enterprise Group : [Order_SEG]

Agriculture, Farm & Food Account [SEG_A_AFF] : [Order_SEG_A_AFF]

Agriculture, Farm & Food Portfolio [SEG_P_AFF] : [Order_SEG_P_AFF]

Vision & Opportunity:

The Agriculture, Farm & Food Account and corresponding portfolios, are in ideal, value and strategy a lot like the Natural Resources Account and are solidified with a more pro-active responsibility, awareness and very practical goals. They are both in the SEG for good reason, secure supply lines. If we don't secure, have, control, distribute and deploy what is essential to our very survival, we will not live long or very well.

Our lives our health now and for future generations is at risk. We can do things a lot better, many have already done that and more, however there is a lot of ground to cover, both physically, mentally, morally, spiritually and pro-actively, unless of course you want to continue to contribute to a life extinction event, and no, we don't have a portfolio for that.

We would like your vote of confidence and to get started on growing great things together. The rewards are infinitely worth it for everyone that joins our efforts with the Agriculture, Farm and Food Account and Portfolio, as whatever you choose to get involved in and contribute to, our job is to see that some how you get that, with improved quality, flavour, more affordable, and as much as possible and production, economic and distribution system in place that lowers that cost over time and becomes self financing, since a lot of this has exponential growth potential and also a lot of added value.

Explore & Discover: Operations; Pro-Active Programs; General Options; Industry Options:

Background: We have two choices, preserve and promote sustainable bio-diversity that is life respecting, healthy and in harmony with the natural world, or face accelerated multiple species extinction that includes our own. Game over.

Right here we remain focused on the solution, not the problem. The idea of embracing change includes having a different way of doing things in this present age, and this is what makes all the difference. We can do this program as simple, convenient and efficient as possible with some really interesting technologies, products and resources that have been and are being developed right now. Some of these things are Made in Canada and available now, others are in the process of developing and making with a built in program of total logistics for our members.

Naturally this works as a network where people that care and organizations that are active and interested in these type of lifestyle choices can work together towards progress.

Thanks for spending time for you and your health! Closing the gap between what we know and what we do is essential to our personal, collective and planetary wellbeing.
