

Capital Vault Incorporated – Trade & Technology Group : [Order_TTG]
Investment Options Profit Sharing Account : [Order_TTG_A_IOPS]

Opportunity & Vision: depending on your interests, involvement and contribution

- Available through the Trade & Technology Group.
- This is beneficial for building assets and revenue stream generation in general or specific technology development, products, services and distribution networks, within a specific industry and company.
- Financial investment in the Trade & Technology Group (or other Membership Options) is not required to participate in the program, or enable employment. It is added as a bonus option for employees and working share-owners and may be customized for the company, product, service or otherwise that is participating in the program.
- Profit sharing capabilities and results are generated from Initial Organizations, Business Combinations and Joint Ventures enabled by Capital Vault Incorporated and participating companies that a member is working with or for, and usually a specific project or product.
- Time is the primary form of non-financial investment contribution. Additionally, intellectual capital and property, assets and resources, personal skills and capabilities useful for the TTG program and participating company, are also included as investment options. Non-financial investment contributions may vary by person, time, resources, opportunity or interest.
- Non-financial investment contributions are valued by mutual agreement.

Explore & Discover:

- All self-directed financial and non-financial contributions and deployable assets in trust may include any combination of special instructions for enhanced flexible asset management.
- Handling securities in CVI-TTG Investment Options Profit Sharing Account is not required.
- Optimizing the Trade & Technology Group advantage!

This program is also available, en route or in progress with the Ultimate Woodworking Group in the Learn and Build program and the Finishing Program, depending on location and members.

- Lifetime membership with more amazing benefits!

Capital Vault Incorporated – Trade & Technology Group : [Order_TTG]
Investment Options Profit Sharing Account : [Order_TTG_A_IOPS]

Notes:

- An Investment Options Profit Sharing Account is different from the Investment Options Direct Account that is available directly by Private Venture Capital Group membership for those who like to allocate resources to more specific securities. This is not banking hours.
- Naturally, equilibrium in optimizing advantages to the participating members, requires math, science and art, working together in consideration of everyone's needs, desires and wishful thinking, to create something exceptional, intriguing and beneficial for all. We believe this is a great opportunity for a job or career, as well as investing time, energy and enthusiasm, personal genius and some heart and soul. Make time, invest time, think and dream a little more about what kind of future we can build together. Be involved in a much more comprehensive way than you ever thought possible. More details are available to members on a confidential basis.
- Compensating value may be based on 1) a fraction of the hourly wage; 2) a specific proportion of the total compensation package; 3) a specific financial amount; and 4) any type of performance based, condition or other useful incentive, agreement, benefit, profit sharing, dividend or bonus. An example is someone working for \$20.00/hour and receiving a \$10.00/hour value in common shares, units or proportion of the total invested time on the project with the corresponding profit sharing agreement.
