

Capital Vault Incorporated – Trade & Technology Group : [Order_TTG]
Trade & Technology Group Options Account : [Order_TTG_A_TTGO]

Opportunity & Vision:

- The integrated TTG Options Account is focused on a specific industry segment, within a range of companies that contribute to various aspects of the development programs. Additionally, an unlimited number of business unit/enterprise, buying groups, co-operatives, industry associations and research facilities and groups may contribute or even benefit directly or indirectly from the TTG Options Account and the TTGO Portfolio. This includes, general or specialized goods, services, technology or expertise.
- The TTG Options Account promotes several dynamic development programs that includes the Operational Elements and the TTGO Portfolio configured to a specific industry, technology, company, product and service, that offers a panorama of potential for both Member/Co-trustees, an enterprise, entrepreneur, entity or association.

Explore & Discover:

- Sequential inter-related aspects of technology and product development converges toward end products. This process and scope of activities includes: prototype, super prototype, limited or full production, design engineering, experimental and applied research and development, with a wide range of applied testing, continuous improvement with refinements, enhancements and modifications useful in any aspect of the logistical system.

Manufacturing may include sub-contract, Official Supply/OEM, custom and production runs, assembly, with solid practical sales, service, training and long term commitment in the product, life, customer, business and related cycles.

This also includes single item to multiple product line development, sales and logistics, with possibilities in joint ventures, business combinations and co-operatives in the various associated manufacturing and service industries.
