

## Capital Vault Incorporated : CVI-CG

CVI-Construction Group [Order\_CG] :

Construction plans, project management schedules, proposals and contracts, materials lists and phone calls to make! All things related to construction. Since construction is a very important industry in Canada and is a major component of what we are doing that is within our field of vision with Capital Vault Incorporated and something that many people work in or benefit directly or from a related industry, in addition to the CVI-Member/Co-trustee, we would like to start by building on a solid foundation with major construction options with some very interesting design elements to consider.

Personally, I like to fire up the compressor, make some noise, bang some nails and have something to show for my time spent. I take great pride in everything I do so I always start with a plan and know in advance what I expect to accomplish. Sounds basic right? With the CVI-Construction Group we have several really great accounts and portfolios that enables us to achieve our major goals and have a few pieces extra thrown in for good measure, things that count and add to the quality of our lives and open up interesting possibilities, just like when we look at a building site and see or have a vision of what could be there. Like many things, this is custom built for a reason, we have a purpose just like a building or facility does or even a person, and if we design it right from the beginning it will be right when it is built and people can enjoy it. So, here are the major self-directed accounts to review;

- CG Unified Account
  - CG MAX RSVP
  - Construction & Development Account
  - Construction Options Account
  - Custom Build Options Account
  - Construction Machinery Account
- Members can pick and choose to secure truckloads of opportunities with the Accounts, Portfolios and Portfolio Series efficiently. Since most contractors and builders know exactly what we are talking about concerning money, assets and resources in trust, the Private Member Agreement will be a piece of cake, just like everything else we do here.
  - Like all CVI-Options and accounts, it's a great idea to have that birds' eye view and check out the shiny new object that really interests you. Each person has values, interests, priorities, needs and desires, and those decisions are based on that, so it is important to know what they are, to direct our efforts and resources into achieve those goals as efficiently and effectively as possible.
  - Our desire is that each Member/Co-Trustee can confidently make better quality decisions and achieve the results they are looking for. This includes an expanded network of contacts, people and companies in the construction world that can all contribute to the mutual success of each other. Solid, secure and reliable compensation is always good to have, and this is something we plan and work at in a very practical and doable way. We all need to exercise more innovative problems solving and every day logistics to make progress and this includes acquisitions, product discounts, revenue stream generation, our ability to pitch the deal, get the contract and achieve and deliver everything we promise and continue to build and expand our business, is all part of the tools we have to work with.

- The capacity to organize and mobilize resources is essential, you will find in essence with CVI, just about everything is centralized on the basic building blocks of materials, machinery, money, management with competent and reliable personnel, poof, the secret to success.

- At any rate, if we have not done our days work by lunch time, most likely it will be done before the day is over. What we will do with the Construction Group is put it to work so that when you wake up in the morning, you are already well on your way to achieving your goals, and this can be done with a good solid action plan that works quietly away without being supervised constantly by you! Check up on it as much as you want, plan your acquisitions like your projects in advance and don't forget to build long term solid revenue sources that can provide for you and your family in a way that you envision. Yes, this goes beyond what your accountant will tell you, way beyond, as this has the logistical power to make it a reality in a way that works for you, to make and save money in all kinds of ways, get the products and services you need, build long lasting personal and business relationship and a portfolio of projects, investments and acquisitions that are in a class of their own.

Right now, we can have a quick review of these accounts, since you might be interested;

- **Construction & Development Account**, is for a specific purpose type building directed to a certain industry or facilities, we have lots of these. These are part of a larger building strategy, some are strategic in nature and many are an industry priority. Members can either invest time or materials, sub-contract or supply products and services and of course work in your area or if you like, while being part of a very important building program. This works with town hall, councillors, zoning and people with a mission, in addition to community and nation building programs. This is construction and serial bond heaven and really Made in Canada!

- **Construction Options Account**, is not directly about construction, but mainly concerns things that contribute to getting the job done, making our life better, saving money, but spending it too and are extra things to consider that might be very useful. The bio-diesel deal is great for guys with diesel cube vans, 4 x 4s, construction machinery and so on who might want to participate in a Bio-diesel Research Group, save money, write a report and enjoy benefits of 'Test Fuel' Also, our pride and joy in this account is the 'Boots for Life Program' that just about everyone can sign up and benefit from. There is more to read, don't worry.

- **Custom Build Options Account**, is directly focused in developing business relationships with the custom builder and prospective customer and the existing building strategy, including products, services, trades, business options and revenue streams. Members may sign-up and build a dynamic portfolio for OEM/Official Supplier, custom made products for the model, spec or custom home. Working with others to achieve their goals is important, creating new combinations can save huge money, improve quality, logistic and cash flow, all good to have.

- **Construction Machinery Account**, is primarily on large heavy duty construction machinery for a wide variety of applications and is mostly self explanatory. Getting the job done efficiently and profitably is essential, revenue streams and terra-forming opportunities abound in the landscape with favour bank benefits. More details are available.

This is the basic summary of the Construction Group, please review in greater detail and get involved asap, we've got a lot of great things to build together!
